The Memory Thief: Volume 2

In Volume 1, Detective Sara Chen discovered that someone was stealing memories from the rich and selling them on a black market she'd never heard of. The trail led her into the basement of a forgotten clinic and a man who could pull recollections from a person's skull with a touch.

She survived.

She didn't escape unchanged.

CHAPTER ONE - The Year After

A year later, Sara was working homicide again, mostly. The memory cases - the ones with the empty stares and the missing weeks - went to a different desk now, run by a quiet woman named Adina who had a degree in neurology and the patience of someone who knew exactly how slowly justice moved.

Sara was glad. The memory cases ate people. She'd watched it happen.

And then on a Tuesday morning in late October, a body washed up under the Williamsburg Bridge, and something about the eyes made Adina pick up the phone.
